

Wheels for Africa - 2008

The World Health Organisation reports that 20 - 30 million disabled people need wheelchairs and equipment, but most of these people have a lack of hope and little ability to purchase any aids.

This year, FIA were delighted to come alongside and partner 'Through the Roof' with their "Wheels for the World" project by donating wheelchairs, walking aids and crutches etc for their work with disabled children in Kenya.

The aim of 'Through the Roof' with this project is to restore and distribute disability equipment to needy people, giving them increased independence and demonstrating the love of God in a practical way, which is also the core of the work of FIA.
